ASSIGNMENT - II

```html
<html>
   <head>
   <title> The Age Calculator</title>
   </head>
<body>
   <script language="JavaScript">
function CalculateAge()
{
var birthyear = document.form1.txt.value;
var currentyear  = new Date();
var age   = currentyear.getFullYear();
document.write('They are either ' + (age-birthyear)+ ' or ' + (age-birthyear - 1));
 }
   </script>
     <form name=form1>
        <h1>Enter the Birth Year</h1>
        <input type="text" name="txt" size=10>
        <br>
        <input type="button" value="Calculate" onClick='CalculateAge();'>
     </form>
</body>
</html>
